The time period for reply, if any, is set in the attached communication.

Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-9 and 11-18, drawn to a fastener system.

Group II, claim 10, drawn to a vacuum pump.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

an assessment of the prior art with respect to the independent claims 1 and 10, provides no unity of invention since the "special technical features", i.e., "each through hole comprises a distal segment that is cylindrical followed by an enlarged proximal segment that is cylindrical about the same axis, the enlarged proximal segment positioned to be adjacent to the stationary structure" common in each of the independent claims is known from Carlson, USP2,560,413,. Applicant should note that the lack of unity is based on a *posteriori* and the special technical features, common to all inventions, do not define a contribution over the prior.

Further, an assessment of the prior art with respect to the independent claims 10 and 11, provides no unity of invention since the "special technical features", i.e., "an annular flange comprising a through hole, wherein the through hole comprises a distal segment and a proximal segment", the size of the distal segment with respect to the proximal segment being smaller, and the proximal segment being closest or adjacent to the stationary structure, which is common in each of the independent claims is known

from Carlson, USP2,560,413. Applicant should note that the lack of unity is based on a *posteriori* and the special technical features, common to all inventions, do not define a contribution over the prior. See MPEP 1850.

A telephone call was made to Mr. Raja N. Saliba on February 11, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
